Allowable Subject Matter

Claims 1-8 are allowed.

The following is an Examiner's statement of reasons for allowance:

Claims 1-8 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims including “determining a first spread data estimate using an element from the cross correlation matrix and recursively determining further estimates using additional elements of the cross correlation matrix” as specified in claims 1 & 5 respectively. Additionally, claims 2-4 and 6-8 are allowed because they depend upon claims 1 & 5 respectively.

The closest prior art is Vollmer (U.S. Patent No.: 6,064,689) and Dell-Imagine (U.S. Patent No.: 5,517,688). Vollmer teaches: a code division receiver in a mobile which receives a combined data signals over shared spectrum, samples the combined signal, estimates the channel response for the combined signal, and determines the cross correlation matrix using the estimated channel response per col. 2 line 22-col. 3 line 38 and per col. 4 line 47-col. 5 line 24 respectively. Dell-Imagine teaches: sampling the combined signal at multiple chip rates per col. 1 lines 22-25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
